

Name:**Section:**

<u>Feature</u>	<u>Description</u>	<u>Notes</u>
Wiring	Both LEDs work and both of them light up the same colors	
Positive Feedback	Messages are written to the console and Twitter when the bot receives a command.	
Error Messages	Messages are written to the console and Twitter when an error occurs (spelling, unrecognized emotion, etc.)	
Differentiated Emotions	Use a wide variety of emotions in your bot, colors are easily distinguished (avoid similar colors)	
Conditionals	Use conditionals in your code to group together different spellings for emotions, group similar emotions, or make the bot multilingual
